Cutoshi

A Manifesto of Decentralization and Innovation

Konnichiwa and Ni hao from Japan and China!

Cutoshi is a revolutionary meme coin inspired by the Chinese Lucky Cat and Satoshi Nakamoto's teachings. It's based on decentralization, privacy, and monetary freedom, embodying the blockchain's original purpose and ethos.

And Cutoshi has a vision - to introduce more people to cryptocurrencies and bring financial freedom to all who want it.

This whitepaper explores Cutoshi's mission to create a decentralized ecosystem - offering essential tools such as a DEX, a Self-Custodial Wallet, and a Learning Platform.

There are also exciting offerings like gorgeous merch, lucky quests, and gamified yield farming for the community to unite and grow.

With Cutoshi's luck and the meme coin's sound fundamentals, Cutoshi will become a pioneering force for DeFi. Crypto will never be the same again!

As the Japanese say: "Look after your cat and your cat will look after you"

Cutoshi

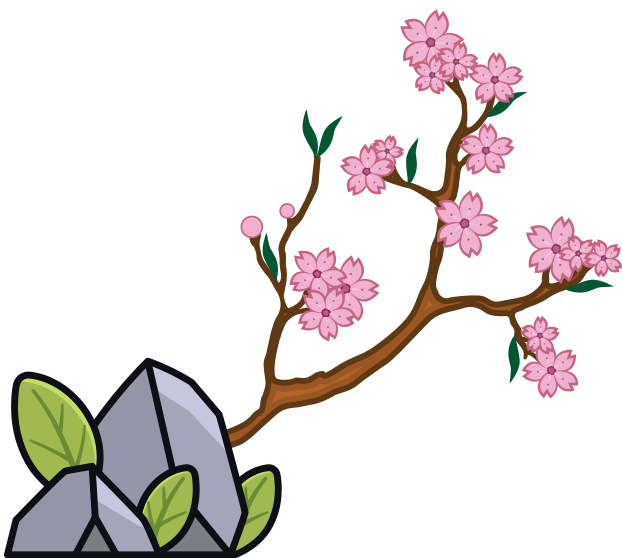

Cutoshi's Vision

Cutoshi's the Lucky Cat's vision is simple yet powerful. And all wrapped up in adorable pixel art!

Cutoshi is creating a movement and a community that embodies the ideals of decentralization, privacy, and monetary freedom that Satoshi Nakamoto dreamt of.

Infused with the spirit of the Lucky Cat, Cutoshi is your key to fun and financial freedom in the web3 world.

Cutoshi and Satoshi believed that traditional finance was designed for the rich and powerful. In contrast, Cutoshi and the blockchain gives the power back to the people!

Cutoshi

Vision:

Cutoshi's vision is to embody the values of decentralization, privacy, and monetary freedom, echoing **Satoshi Nakamoto's** original vision for blockchain technology. By infusing the spirit of the **Chinese Lucky Cat** with these ideals, **Cutoshi** aims to create a community-driven ecosystem where control and decision-making power lay in the hands of its users.

Cutoshi Ecosystem

If we want to bring the best of DeFi to the people, there are several important things we need. And the Lucky Cat has them all, and then some!

1 Cutoshi Swap and Burn:

Cutoshi features a multi-chain decentralized exchange (DEX) which makes it easy to swap digital assets across chains easily and privately.

Like PancakeSwap and other famous DEXs, Cutoshi will take 0.25% from every trade. 80% will be used to reward liquidity providers, and the rest goes to buybacks and token burns, keeping our \$CUTO price healthy.

2 Cutoshi Wallet

A dex is no use without a wallet! Cutoshi offers its community a secure self-custodial wallet, so that people have full control over their own crypto.

Better still, the wallet is multi-chain, meaning that Cutoshi fans can see all their assets in one place.

3

Cutoshi Quests and Farming

Yield Farming is a vital part of DeFi. Cutoshi the Lucky Cat offers big rewards for the community to provide liquidity. Members can show their loyalty to Cutoshi while earning \$CUTO, and vying for a place on the Lucky Cat Leaderboard.

Quests will bond the community together while making everyone richer. Cutoshis (Cutoshi's followers) can engage with the platform, complete various missions, and be an active part of the community.

This earns them cuto points which can be harvested for rewards.

And did we mention the Lucky Cat Shrine where people can win prizes and surprises?

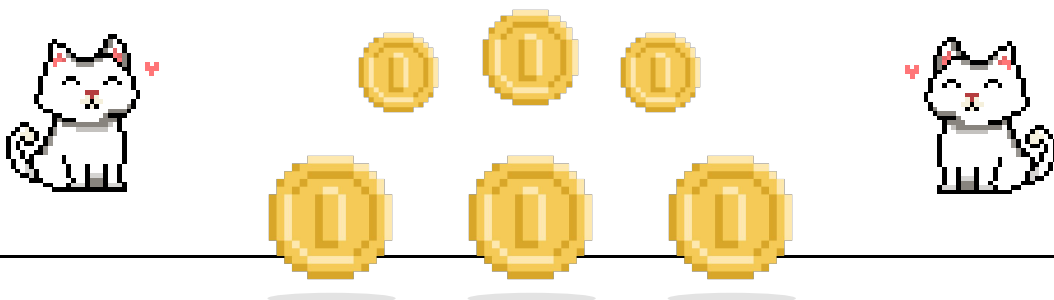

4

Cutoshi NFTs

Who says you can't own a piece of luck? The Lucky Cat will release a limited NFT collection of 8000 pieces.

These will be awarded to community members and early Cutoshi adopters for their engagement, loyalty, and participation. Cutoshi is for everyone.

These NFTs will be gorgeous and can be used to show pride in the community and held for prosperity. But they are also designed with DeFi utility in mind. Think NFTs with different rarities and important use cases.

Cutoshi

5

Cutoshi Learning Academy

In the spirit of empowering the people, Cutoshi will create a learning academy to teach people more about cryptocurrencies, web3, DeFi and more. While most of the academy will be free to access, certain advanced modules will be payable in \$CUTO, introducing additional utility to the coin.

6

Cutoshi Merch Shop

Lucky cats line the homes and businesses of those who wish to have good luck and prosperity. The Cutoshi merch shop will make it easy to bring the Lucky Cat with you wherever you go. From clothing to bags, mugs, notebooks, and tech gear, the community will be able to show off Cutoshi with pride.

Cutoshi

Cutoshi Roadmap

Phase 1

Presale Launch & Yield Hunting

Cutoshi begins the journey with audited smart contracts, ensuring safe sales of \$CUTO tokens. Right after, the smart contracts for yield farming will go live, allowing people to grow your stash by providing liquidity. The earlier you people the movement, the bigger their \$CUTO bag will be – so don't miss out!

Phase 2

DEX Rollout & Testnet Trials

With Cutoshi's expert dev squad on the prowl, the \$CUTO DEX will be unleashed. Soon, we'll be able to trade privately across chain while the buybacks and burns begin, keeping the ecosystem thriving.

Phase 3

Community, Learning Hub, & Merch Drop

Cutoshi loves to play, which is why we'll launch community-driven events where you can earn \$CUTO by participating in fun challenges. We're open to ideas and memes from community members who want to help shape this adventure into something extraordinary.

Cutoshi

To spread knowledge, Cutoshi's Learning Hub will be introduced so everyone can get on board with the vision of DeFi for all.

And don't forget the exclusive Cutoshi Lucky Cat gear and merch when it drops in the store!

Phase 4

Strategic Alliances

Forging strong partnerships is key, and Cutoshi will be teaming up with creative, interesting and key players both within and outside the crypto world.

Cutoshi

Community and Partnerships

Cutoshi loves its community and places a strong emphasis on community involvement, collaboration, and partnerships. Regular events, creative initiatives, and collaborations with hodlers, artists, developers, and influencers will be an essential part of the Lucky Cat's manifesto to realize Satoshi's vision.

By empowering users to participate in the ecosystem's growth and development, Cutoshi will create a network of lucky like-minded people who stand up for decentralization, privacy, and financial freedom.

Cutoshi's Conclusion

Cutoshi the Lucky Cat is the symbol of a new era of DeFi, aiming to bring us closer to mainstream adoption.

Through its ecosystem of products, educational initiatives, NFTs, quests, yield farming, and community-driven ethos, Cutoshi represents the transformative power of blockchain technology.

So, are you ready to join the luckiest movement in crypto? Join us on this journey as we harness our diamond paws and grow stronger together.

Power and prosperity to the people!
